RI TRANSPARENCY REPORT

2019

Söderberg & Partners Asset Management S.A.

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2019 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OO 11.3b

If your organisation does not integrate ESG factors into investment decisions on your externally managed assets, explain why not.

We do not hold cash positions for investment purposes. It is only held as collateral or to provide liquidity for shareholder transactions.

OO 11.4

Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

We incorporate ESG in the manager selection process. We utilize Söderberg & Partners group's sustainability analysis and rating of funds as valuable input when screening for external managers. The sustainability analysis covers positive selection and active engagement at fund company and fund level. This results in a shortlist of external managers from which we select manager for the investment in scope based on a qualitative analysis including ESG parameters that are material for the investment.

We monitor the external managers regularly and engage with them. Applied to all our holdings in listed equity, we conduct screening on the underlying holdings against the exclusion lists of norm-setting entities. If the screening exercise identifies flagged holdings, we begin a dialogue with the manager to discuss the holding and their view on the subject. The managers are often aware of matter and have already taken measures to engage with the holding on this topic.

We also conduct follow-up meetings where various ESG topics are discussed on frequent basis. As an investor, we believe active engagement on areas for improvement supports the managers to continue their advancement in this area.

OO 11.5

For your externally managed pooled funds, describe any mechanisms in place to set expectations as part of the appointment or commitment process.

Being a signatory of the UNPRI is a prerequisite in the selection of new investments. We value external managers where ESG factors are an integral part of the investment process.
