RI TRANSPARENCY REPORT

2020

Söderberg & Partners Asset Management S.A.

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OO 11.4

Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

The Company incorporates ESG in the manager selection process. Söderberg & Partners group-wide sustainability analysis and rating of funds is utilized as valuable input when screening for external managers. The sustainability analysis covers positive selection and responsible ownership at management company level and fund level. This results in a shortlist of external managers from which manager for the investment in scope is selected based on a qualitative analysis including ESG parameters that are material for the investment.

Before any investment is initiated, questionnaires are sent out focusing on the manager's sustainability processes alongside the Company's Policy for Responsible Investment. Follow-up meetings are conducted where various ESG topics are discussed on frequent basis. As an active investor, the Company believes engagement supports the managers to continue their advancement in ESG.

The Funds will not invest in other funds with severe or systematic ESG controversies. The investment in other funds should be in compliance with the our Policy for Responsible investments and should not be made if the Funds deem that the underlying funds are not likely to address identified problematic issues within an acceptable amount of time. Should the monitoring show that the management of the underlying fund fails to perform on issues related to ESG, we shall act by taking one or several of the following measures; (1) Initiate a dialogue with the management of the fund; (2) engage with the management of the fund; or (3) sell our holdings.

Sustainability is an integral part of the Company's corporate culture, and the asset management is based on the foundation laid out in the Policy for Responsible Investment. Sustainability refers to the environment, climate, human rights, labour standards and business ethics, and is based on international norms. We believe that companies which conduct their business in a responsible and sustainable manner will benefit both their customers and the society.

The purpose of the sustainability work is to impact the world for the better. Therefore, the Company incorporates research within sustainability and responsible ownership to work on the approaches that results in the greatest positive impact.

The inclusion strategy focuses on the potential impact of environmental, social and governance issues on companies. The Company will include companies where possibilities exist for improvement and where there are opportunities to engage.

The Company does not invest in companies that do not show a willingness to comply with the Company's implementation of the Policy or where the Company deems that the companies are not likely to address the problematic issues stated below within an acceptable amount of time.

Scope and process	For the strategy Aktiv Påverkan, a project was initiated during 2019 in order to enhance the external managers sustainability work. Söderberg & Partners addressed external managers with a rating where improvements were considered possible. Meetings were conducted followed by a short report on things to improve or things to continue with. Later on, when they had time to address these issues, Söderberg & Partners received feedback.
Outcomes	Several external managers increased their sustainability rating.

LEA 06.3 Additional information. [Optional]

The Company aims to be engaged in the most efficient and appropriate way for each individual investment. In case the result of the Company's ESG monitoring indicates that there is need for improvement or there are signs of corporate governance issues in one of the investments, the Company shall take the measures deemed necessary. The first step is to initiate a constructive dialogue with the relevant company. Should the company not respond in an adequate manner or undertake necessary changes, other measures should be considered, like the exercise of shareholder rights or, ultimately, ending the investment.
